Company Announcements Office
Australian Securities Exchange Limited
4th Floor, 20 Bridge Street
SYDNEY NSW 2000

Dear Sir/Madam

NOVEMBER DRILLING PROGRAM PLANNED AT BARLEE

The company is pleased to announce that it is accelerating the exploration of the mineralised province at its Barlee Gold Prospect, north of Southern Cross and will commence further drilling in November.

The company has submitted application for drilling approval with the Department of Mines and Petroleum and has finalised agreements with drilling contractors to commence on site mid November. The planned drilling program will include approximately **10,000 metres** of RC and RAB drilling and its objectives include:

- To test the previously undrilled western extension of Halleys East identified in the last program where a new mineralised intercept provided a result of **12m @ 11.23 g/t Au.**
- To test the down plunge extent of Phil South which remains open and where RC drilling intersected **14m @ 3.03g/t Au.**
- Further drilling of the newly identified mineralised zones at Crabman South and Phil North.
- To drill further priority regional targets where soil geochemistry and interpretation of aeromagnetic data has identified potential mineralised shear zones.
- To obtain further geochemical samples on outlying regional targets identified from interpreted aeromagnetic data and the revised geological model. The regional soil sampling will commence on site at the end of October.

For and on behalf of
BEACON MINERALS LIMITED

Darryl Harris
Managing Director
