

**The mysterious symbolism and exotic imagery gives the works at Chapels On Whatley mystic connotations.**

Oriental furniture is often regarded as enchanted objects that add a soul, depth and a personality to any room.

Throughout Asian history, furniture has served a decorative, artistic and practical function. Details play a central role in eastern furniture design, whether aspects such as hinges, handles and corner mounts, or the springy comfort of cane work, they were planned into the overall aesthetic of the designs.

*Come and visit our team at Chapels and see the exquisite offerings from the east, we will be happy to welcome you.*
