

Start Up

Check water reservoir is full. Add cold water if necessary. Turn machine ON.

Before making the first coffee of the day. Place cup under chrome nozzle. Push the "Manual Dosing Button", and fill cup. Push button to stop. Remove water from cup.

Place cup under milk frother. Then push the steam button (green light will flash until ready). Push the steam button again, allowing it to run for 60 seconds.

Important

Replace Water Filter as supplied with each new box of coffee cartridges

- **Preheating your cup will increase the coffee temperature.**
- **Using cold cups will decrease the coffee temperature.**
- **Stronger coffee can be achieved by using 2 coffee cartridges.**
- **Weaker coffee can be achieved by stopping the flow of the coffee in the cup early.**

Coffee

Ensure the machine is ready to use. The lower green light, far right hand side, permanently ON.

Open RED cartridge door (front of machine). Position a fresh coffee cartridge and insert by pushing the RED door closed.

Place your COFFEE SYSTEM CUP ONLY under the chrome nozzle. Any larger cup or mug will result in a very weak coffee.

Press the Auto Dosing Button (2nd from the left). This will automatically give you a measured dose of espresso coffee.

Milk

To make a cappuccino or latte place cold milk into the steam jug. Press the steam button. Then, after the green light stops flashing, press again and steam will flow out of the steam arm.

Position the jug under the milk steamer ensuring that the steam arm is just touching the top surface of the milk in the jug. Push the same button again to stop when you have reached the desired temperature / texture of milk.

Pour the milk into you coffee Easy.

Cleaning

Check water reservoir is full. Add cold water if necessary. Turn machine ON. Using cleaning tool, insert and remove used cartridge.

Press Manual Dosing Button. Allow to run for approx 15 secs then press to stop. Repeat this at least twice.

Open cartridge door and insert blank cartridge supplied and close door. Place a cup beneath coffee spout. Press Manual Dosing Button and allow to run till cup is full. Using cleaning tool, insert to remove and retrieve blank cartridge from waste bin.
