PE'TYE
Essential for Fine Dining

PIN FIRED

All Pe'tye's flatware items are fired during the glazing process on small pins. This technique ensures all pieces have a smooth, fully glazed foot. The major benefit, is that when plates stacked, scratches and abrasions are greatly reduced.

EXCELLENT PERFORMANCE

Pe'tye is incredibly durable, strong and lightweight. The high percentage of Alumina added to the raw materials ensures resistance to chipping and breakage. This exceptional strength results in a longer life span, therefore lowering replacement rates.

TWO YEAR CHIP WARRANTY

The Pe'tye range comes with a two year Chip Resistance Warranty. We stand by our products and you can be assured that each piece has been designed to withstand the dynamics of a commercial kitchen.

SHUN KNIVES - A Lifetime Investment. Made in Japan.

Shun knives strike a fine balance between cutting-edge technology and traditional Japanese design. Every Shun knife is crafted from the most advanced materials available using techniques perfected by and passed on through countless generations of master sword smiths.

The distinctive wavy pattern on a Shun knife is the result of sandwiching an extremely hard 'super steel' core between 32 micro-thin layers of polished stainless steel. This unique construction creates a brilliant Damascus-finish blade with a razor-fine edge that's easy to sharpen and maintain. All Shun knives are guaranteed for life!
