

ABS Double Union Ball Valve Specification

ABS is a fully matched pipework system that provides a wide acceptable use temperature range. ABS products can remain extremely ductile even when the temperature is as low as negative 40 degrees celsius. ABS products are also incredibly lightweight making them easier to handle when compared to traditional materials, especially during installation. ABS products are fully WRAS approved.

Key Product Features

- Lightweight
- Easy to install
- Wide temperature range
- Tough and durable
- Corrosion resistant

Typical Applications

- Chilled water
- Boosted cold water
- Potable water
- Low temperature cooling
- Demineralised water
- Vacuum systems
- Waste water

Available Sizes

Size(mm)	Size(inches)
25	1
32	1 ¼
40	1 ½
