

Product Specification

API - Spin Clean Filters

Applications:

High quality screen filter for agriculture and landscape irrigation systems.

Specification:

AG Products “Spin Clean™” filters are unique in that incoming dirty water is forced through a directional nozzle plate onto the inside of the stainless steel screen. This creates a centrifugal action which rotates debris down the screen wall to the large debris holding basin. Debris is flushed out via a ball valve or unscrewing cap. Spinning action keeps more of the screen area clean, minimizing pressure losses due to excessive dirt build-up.

4E20-50

4E25-50

Features:

- 20mm and 25mm inlet/outlet
- Two piece threaded housing with ‘O’ ring seal.
- Molded from high heat and chemical resistant ABS plastic.
- Ball valve for flushing debris.
- Stainless steel filter screen.
- 20mm screen area 585mm
- 25mm screen area 710mm
- 20mm maximum size cleaning efficiency 15LPM
- 25mm maximum size cleaning efficiency 26LPM
- Maximum operating pressure 550kPA
- Mesh selection 50, 100, 150
- 20mm maximum flow 42LPM
- 25mm maximum flow 105LPM
