

Ecocare Activator

- the answer to your waste system problems and guaranteed to swap smells for smiles!

If your drains seem sluggish and are starting to smell, or the toilets slow to flush, the chances are that your waste system needs some attention. Nasty odours, clogged drains, overflowing tanks and blocked trenches are more than just embarrassing and inconvenient though... they can be costly to fix and, more importantly, dangerous to your family's health. When it comes to waste system problems you need them fixed fast, and you need to make sure they won't come back... **Ecocare Activator** will solve your problems quickly, simply and cheaply.

**ELIMINATES
AND
PREVENTS
BLOCKAGES**

The Problem

Septic systems, including conventional septics, aerated wastewater systems (AWTS) and other onsite treatment systems, rely on the action of naturally occurring bacteria to break down waste. However, harsh chemical based cleaners and non-biodegradable detergents can quickly kill off good bacteria and upset the balance of your system.

With too few bacteria, or the wrong type, your waste system's efficiency drops dramatically. Bad smells develop, waste is left unconsumed, and blockages and expensive pump-outs become more frequent. You might even have to renew your leach drains and absorption trenches. And that can be very expensive.

The Solution

Safe, non-toxic, and completely biodegradable, **Ecocare Activator** is a scientifically developed blend of natural ingredients, grease dispersants and biological stimulants that kill odours on contact, cuts through grime, breaks down grease and fat, and helps restore and maintain a healthy bacterial balance in your system.

Quick, safe and simple to use, the fastest way to solve septic and greywater problems with **Ecocare Activator** is simply to pour the recommended dosage into the sink, down the toilet or into your washbasin, bath or shower.

Ecocare Activator goes to work at once. As it moves through the pipes it softens and breaks down built-up residues, transforming grease and fat into small globules that can be easily digested by naturally occurring bacteria.

The unique blend of trace elements and bacterial stimulants in **Ecocare Activator** then goes to work to ensure that nature's own 'good' bacteria have everything they need to thrive. Blockages are removed, the breakdown of waste material is accelerated, bad smells and odours disappear and proper drainage is restored in leach drains and the surrounding soil.

**DESTROYS
ODOURS
ON
CONTACT**

Ecocare Activator is an effective, economical multi-purpose product with many uses around the home. Supplied as a handy liquid concentrate you simply dilute it to suit your application. Solves odour and blockage problems – and prevents their reoccurrence – in conventional septic and AWTS system, grease traps, greywater irrigation systems and drains. Also excellent for odour control and cleaning!

Total Treatment

Ecocare Activator offers users much more than just a quick fix for smelly septics though. The same characteristic that help **Ecocare Activator** unclog drains and fix waste system problems also make it an extremely effective cleaner.

Perfect for hard surfaces such as tiles, laminex, and porcelain, it's ideal for use in the bathroom and toilet...and because it's totally non-toxic it's safe to use in the kitchen and around young children.

Ecocare Activator outperforms harsh chemical cleaners and just as importantly it stops you poisoning your waste system and keeps it healthy for years to come. Every time you use it to make your home fresh and clean you're giving your waste system and drains three-step "**Total Treatment**" protection. It's simple:

Step One: Clean your home with **Ecocare Activator** – use it in the kitchen, laundry and bathroom to wash down your shower, bath, basins, tiles and toilet...you can even use it on the floor.

Step Two: Clear your drains and pipes – rinse down and pour remaining **Ecocare Activator** into the drain when you finish cleaning...it's no waste because **Ecocare Activator** will make sure your pipes flow free and stay fresh smelling.

Step Three: Condition your system – having cleaned your home and cleared your pipes **Ecocare Activator** flows into your system where its special blend of ingredients revitalises your system and maintains it in peak condition.

Try it, and you'll find that **Ecocare Activator** really works. And when you add up what you save in plumbers' bills and conventional cleaners you'll discover that **Ecocare Activator** is real value too!

100% Money Back Guarantee

There's no better advertisement than a satisfied customer, and there's no shortage of people who have proved that **Ecocare Activator** really does work. In fact we're so confident that we offer a 100% money back guarantee – use Activator as directed and if it doesn't solve your problems simply call us within 90 days of purchase and we'll gladly refund your money.

RESTORES TRENCHS, REVITALISES WASTE SYSTEMS

Here's what C. Shaffner of WA had to say: 'I put **Ecocare Activator** to the test when I noticed foul-smelling water bubbling up from the trench. I used Activator to do my household cleaning and poured the rest into the toilet and drains. I was delighted to find that, after only a short period of time, I saw significant improvements, The horrible smelly liquid had stopped bubbling up, the drains were fresh and free-flowing, and the house was sparkling".

Dolores from Qld agrees: "When I first ordered **Ecocare Activator** our septic tank wasn't working properly. Two plumbers had suggested we needed a new soaker trench and tank. While waiting and waiting for these busy plumbers to come and put in the new trench and septic tank I decided to order your product. Well, Activator has solved the problem and the plumber has finally turned up. He said we didn't need a new trench or tank at all, and he left with the Activator brochure in his hand.

"All I can say is thank you and congratulations on a great product"
