

DRIPPERS & DRIP LINE ACCESSORIES

DRIPPER ACCESSORIES

PC SPRAY STAKE

APPLICATIONS

- For all mini-spray nurseries and greenhouses applications

FEATURES & BENEFITS

- Pressure compensated flow ensuring constant flow rate at varying inlet pressures
- Optional CNL: When pressure in the pipes drops (after valves shut off at the end of an irrigation cycle) and the desired pressure is achieved, the CNL mechanism closes the water passage. The pipes remain full of water and ready for the next cycle
- Ensures uniform water and nutrient distribution during irrigation
- Allows the installation of spray stake systems in areas with steeper slopes
- Uniform wetting pattern over the entire surface
- Horizontal connection
- Water flow blockage mechanism to function when a pot is sold and/or shifted from position to prevent water and fertiliser loss
