SPEED CLIPS

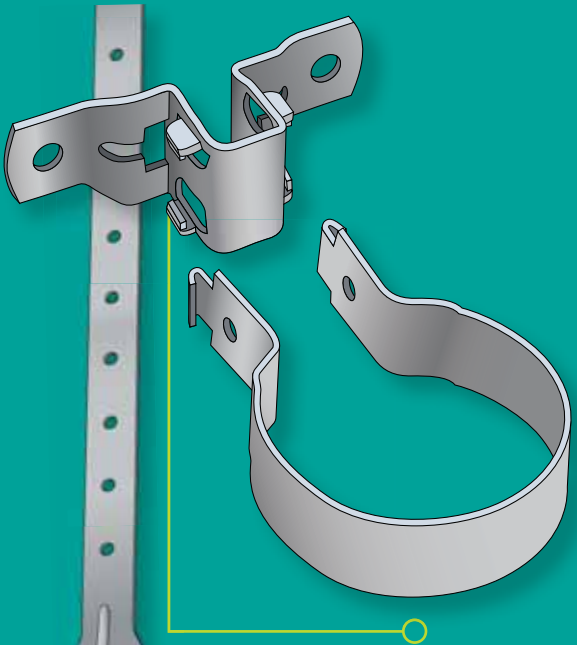

THE GREATEST INNOVATION IN CLIPPING
IN 35 YEARS

www.abeytrade.com.au

ABEY SPEED CLIPS*

THE FASTEST CLIPPING SYSTEM, EVER

Note the “nutless” construction of the stand off bracket has added positioning guides that hold the clip firmly when fitted. The clip is simply pushed into place, making installation 5 x faster.

All clip heads are engineered to meet exact specifications that allow for pipe expansion and contraction. The clip is simply pushed into place, making installation 5 x faster.

*Patent applied for.

Today, more than ever, 'Time' is critical. The construction process is linear, so getting the project done on time and on budget relies upon the various trades to do their job in the right sequence and on time. Holding up just one component can have a domino effect on the overall job, costing time and money. Abey Australia appreciate the pressures that plumbing professionals face in meeting tough deadlines and have revolutionised clipping forever with their integrated Speed Clipping System, designed to save you time.

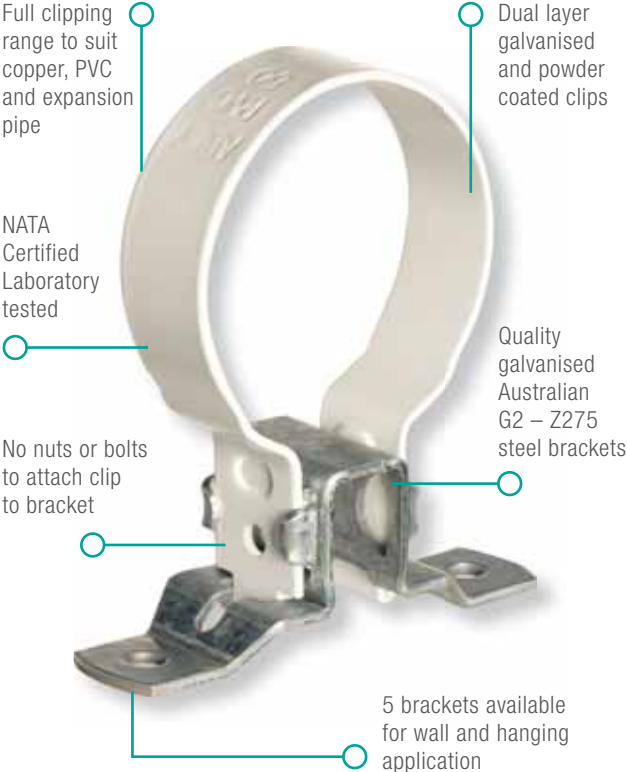

- Speed Clips – Speediest click and go system ever
- Speed Clips – 5 times faster installation
- Speed Clips – No fiddly nuts and bolts to fasten clips
- Speed Clips – Australian designed and made
- Speed Clips – Fully integrated system
- Speed Clips – Quality that's built to last
- Speed Clips – Superior to cheap imports
- Speed Clips – Give faster, better, stronger results
- Speed Clips – Patent applied for

ABEY SPEED CLIPS

THE GREATEST INNOVATION IN CLIPPING FOR 35 YEARS

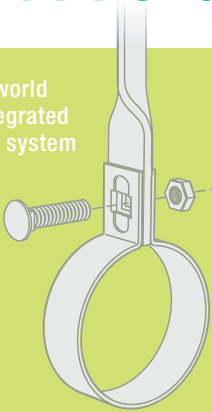

In 1978 Abey developed the first fully integrated clipping system that became the standard in Australian clipping for over 35 years. Designed and manufactured in Australia, these brilliant clips have withstood the test of time. Copied by many but none could match the precision or quality. Abey have again lifted the bar with their revolutionary new Speed Clip Integrated Clipping System... the fastest and easiest clipping system in the world, making everything else obsolete.

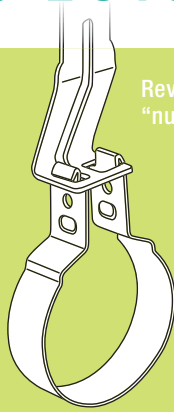

ABEY INTEGRATED CLIPPING SYSTEMS

1978 to 2013

Abey's world first integrated clipping system

Revolutionary "nutless" system

Step 1 Choose and fasten appropriate bracket for the job at hand.

Step 2 Fit clip around pipe.

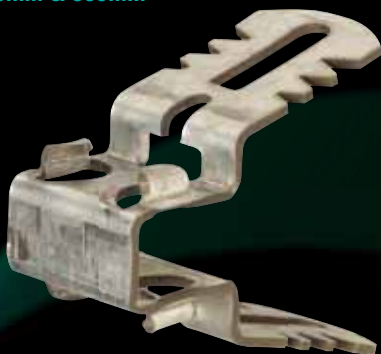

Step 3 Simply squeeze clip end and insert into bracket.

ABEY SPEED CLIPS

THE "NUTLESS" CLIPPING SYSTEM

Hanging pipes can often prove to be an awkward if not dangerous task, especially when trying to fit and hold heavy pipe work while fiddling about with nuts and bolts. Abey have eliminated the need for using nuts and bolts to fasten clips to brackets with their innovative new Speed Clip System. This totally integrated system has been designed and engineered to the most stringent specifications and manufactured to suit commonly used copper, PVC and expansion pipes. The clips and brackets are fully interchangeable and have been designed for use in most common plumbing applications.

Without nuts or bolts to juggle with, plumbers gain an extra hand with Abey Speed Clips – making installation of pipework easier and safer.

LABORATORY TESTED

Abey Speed Clips have been extensively developed and tested at NATA certified ALS laboratories for strength and compression. This rigorous testing has resulted in the development of a better system that is not only strong but easier to use and 5 times faster to install than all other traditional clipping systems on the market today. Saving plumbers valuable time & money.

AUSTRALIAN MADE

The Abey Speed Clipping System has been proudly developed and manufactured in Australia to the highest technical standards. Providing professional plumbers the most efficient, cost effective and high quality clipping solution they can rely upon. And is supported locally. For over 35 years Abey's first interchangeable clipping system was developed and has proven to withstand the test of time.

The new Abey Speed Clipping System takes this to the next level. See the installation video on the Abey Trade website and see for yourself – www.abeytrade.com.au
