

SPRAY PAVE

Aesthetically attractive, extraordinarily tough and slip-resistant.

Complicated shapes like staircases, curved or sloping areas etc. can be treated easily and quickly with **Spray Pave**.

With the stencils developed by **Spray Pave** a strong, lasting and good looking surface can be achieved without limiting the creativity.

Spray Pave

Consisting of a mixture of acrylic polymer, cement, garnet and natural colour pigments, is applied to the concrete surface by a special procedure and after a curing has excellent adhesive strength and reaches a strength that is 3x that of concrete

With the numerous colours and patterns designs are limited only by your imagination. Even company logos, characters, numbers, lane indication arrows and markings can be easily worked in.

CONCRETE SURFACE COATING is suitable for:

Warehouses, manufacturing plants, driveways, parking areas, industrial areas, ramps, street refuges, garages, sidewalks, footpaths, terraces, house entrances, entrance foyers, floors, staircases, shopping centres, catering trade, housing areas, as well as for many other areas where one calls for utmost surface quality in combination with creative design.
