

Urban Tanks

<p>The Courtyard Tank <i>Area Coverage – less than 0.5 square metres</i></p>		<p>This rainwater tank is a slender round tank that looks attractive in a courtyard setting. It is ideal for storing rainwater for drinking, the most popular use of this rainwater tank is watering delicate courtyard plants. The water is pure and free of chemicals, so there is no staining of the leaves</p>
<p>The Slimline Tank <i>Area Coverage – less than 0.9 square metres</i></p>		<p>The slimline tank has an oval shape and is designed to fit under the eaves without compromising tank capacity. An ideal tank for collecting rainwater for drinking water with an elevated tap it has easy access.</p>
<p>The Suburban Tank <i>Area Coverage – less than 1.6 square metres</i></p>		<p>The Suburban is a traditional round shaped tank. It is perfectly suited as an all rounder to water plants or connect to a small pressure pump. The suburban 2500L can be fitted to supply appliances like a toilet and/or washing machine.</p>
<p>The Space Save Tank <i>Area Coverage – less than 1.57 square metres</i></p>		<p>The Spacesaver tank has a width of only 0.715m, this allows the tank to fit easily along the wall under the eaves without protruding. It is versatile allowing for an outlet and overflow to be fitted on either side.</p>
<p>The Terrace Tank <i>Area Coverage – less than 1.9 square metres</i></p>		<p>The Terrace tank offers a large capacity storage, it is a slimline design allowing easy fit along the wall of the home. The terrace tank can be placed directly onto pavers and is ideal for connecting to a pressure pump for greater use.</p>
