MEGA, ELECTRA and B'HAVE High Velocity Low Impact safety sunglasses comply with AS/NZS 1337:1992 and AS/NZS 1067:2003. They are made of Grylamid TR 90 frame material and offer a stylish and fine wide vision design that can resist the day to day abuse of the wearer. The dimensions of the frames provide protection all around the outer skin of the eye. They are inserted with 9, 8 and 10 degree curve polycarbonate prism corrected lens respectively that are 99% protective of UV rays. For the environmentally fashion conscious wearer in a light industrial application, MEGA, ELECTRA and B'HAVE allows for comfortable extended occupational and recreational use in an active environment.
