

Adapt to any Environment

Choose a style

Choose a low profile goggle strap and face foam for high velocity occupational activity

Easy lens release and insert

803 Transformer

Choose your own

Build your own system to adapt to any environment. Construct or deconstruct one pair of glasses with its accessories to arrive at the right solution for any given environment whether at work or play. The EYRES distinctive modular frame method also boasts the added flexibility of interchangeable lenses to adapt to changing light conditions.

- **Switch** lens types from **prescription** to **plano**
- **Change lens tints** to suit activity
- **Convert** into low profile goggles by adding a strap and ventilated face foam
- Lock in a **performance prescription** insert
- **Add** a protective shield
- Contain it all in a **protective hard case** for ease of access

Change lens tints to suit activity, or light changes
