**Basic Items Required:**

- Mehron "3-D Gel"
- Mehron Stage Blood
- Plastic Knife or Spatula
- Boiling Water
- Stageline™ Makeup Brush

**For Even More Realistic Effects Use:**

- Mehron "Colorset" Powder
- Mehron Fantasy F-X Makeup in Soft Beige Color

## MEHRON 3-D GEL SPECIAL EFFECTS APPLICATION

- Place bottle of Mehron 3-D Gel into hot water (70°C/158°F water is optimal. NO HOTTER!) until Gel has liquefied (Do Not Microwave). Always test the temperature of Gel before using. Apply directly from the bottle, or squeeze small amounts onto a clean, hard surface.
- Using a small brush, finger, or spatula apply small amounts of 3-D Gel onto skin (Figure 1). Apply in thin layers until desired thickness is achieved. Allow to cool between layers. Blend in well with the skin dipping finger into warm water and smoothing over the 3-D Gel.
- After the 3-D Gel is applied in the desired thickness allow to cool. Cut or tear away pieces to create open wounds or cuts (Figure 2).
- With a small brush apply Mehron Stage Blood for desired effect (Figure 3). Hint, for open wounds gently push Stage Blood underneath the 3-D Gel from the open wound edge. This creates a bruising effect.

### Optional Special Effects and Tips:

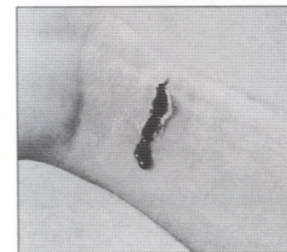

- Add Mehron Liquid Makeup to the liquefied 3-D Gel for special effects coloring.
- To create textures and bumps, use a cosmetic brush to tack the gel before it fully cools.
- Use a makeup base prior to the Stage Blood to blend in the Gel to your skin.
- An application of Mehron "Colorset" powder will reduce the shine.
- For longer lasting "blood" effects use Mehron's "Blood Red" 3-D Gel in place of the Stage Blood.

### AN UNLIMITED USE OF APPLICATIONS

Bullet Holes

Slit Wrist

Burns

**WARNING! Burns may occur!** Always test temperature of Gel before using. DO NOT MICROWAVE or use a heat gun. Do not put in ears or eyes. Recommended for ages 10 and older. Adult supervision required.
