RANE Audio Products

Ashton Admor is proud to introduce our new Rane series of products. These are just a couple of examples.

The **SEQ 30S Stereo Equalizer**. - A 30-band equalizer with a single set of faders that control left and right simultaneously for true stereo applications.

HC4 Headphone Console - If you and three others need to listen to the same mix under headphones without disturbing others, just plug in 4 headsets, turn on, adjust the individual volume control and enjoy!

SELECON

We are pleased to announce our Selecon range of lighting – The **Acclaim Fresnel 6°- 60°** has a soft edge beam that can be easily blended together with others for even illumination. Very suitable for drama usage. The **Acclaim Zoomspot** is available in standard or wide angle. It has a very defined beam that can draw attention to a definite area of the stage. Both these lights will take gobos.

AGING WITH LATEX

A special-effects makeup artist by the name of Dick Smith, first invented this popular

method of aging. This method has been used for many films throughout the years and with practice can produce a realistic effect. You will need –

- ✓ Appropriate base makeup
- ✓ Liquid Latex
- ✓ Foam latex applicators
- ✓ Hair dryer
- ✓ Translucent Powder
- ✓ Powder puff and powder brush

- 1) If the latex will be added over finished makeup, keep the makeup base to a minimum.
- 2) To form wrinkles to the back of the hand, get the subject to form a fist so the flesh on the hand is tight.
- 3) Soak up latex in a foam wedge and stipple a thin, even layer of latex over back of hand.
- 4) Force dry with warm hairdryer until latex 'cures'. Latex should now be semi-clear and a little sticky.
- 5) Powder latex with translucent powder and unclench the fist, the skin

should form small fine wrinkles.

- 6) To deepen the effect add another layer of latex, repeating steps 2-5. All powder can be gently removed with a damp sponge.
- 7) To create wrinkles on the face, gently stretch a section of the face and apply latex to stretched skin.
- 8) Dry with warm blow dryer until semi-clear. Powder latex before releasing the skin.
- 9) Continue on to another area and when face is finished, wipe off powder. Now details such as wigs or hair white can now be applied.

PROBLEM?

Always a Mehron Solution...

Mehron makeup has such a clever range of specialty products to solve your makeup problems.

Problem - Cream makeup 'melting' under stage lights.

Solution – Apply cream makeup, set with 'Setting Powder' & spritz area with 'Barrier Spray'.

Problem – Makeup sweating off.

Solution – Apply 'No Sweat Skin Prep' before applying base makeup & follow with Setting Powder.

Problem – Need to cover skin blemishes, birthmarks or tattoos?

Solution – Our range of 'ProColorRings'. For tattoos or large birthmarks, use 'Tattoo Cover'. 'Concealer' corrects dark circles or

shadows on the face and 'Neutralizer' corrects any underlying skin tones or discolorations.

Problem – Intricate Designs are smearing off.

Solution – Either using Barrier spray on finished makeup to set it or for an almost 'tattoo-like effect, paint on 'Fixative A' over design.

Problem – How to get an easy & effective scar effect.

Solution – Paint on 'Rigid Colodion'. To deepen the effect add

a second coat and gently pinching skin together as it dries.
