## Hair White / Silver

**Hair White & Hair Silver** are water-based colours that are high in pigment. Great for Santa Eyebrows and beards!

- Apply to clean, dry hair. (Style the hair first.)
- Use a cosmetic sponge to apply to large areas of the hair, starting at the roots.
- The hair will absorb the colour as it dries. (i.e. black hair will become lighter)
- To intensify the colour, apply a second coat after the first coat dries. A third coat will colour the hair white.

**Hint** – The product needs to completely layer the previous coat, so a sponge does the best for the application. For small areas or streaks, use the brush enclosed or a toothbrush.

For blonde hair, **Hair Silver** should be used first to darken it, and then the white can be applied (product should not be used on recently treated/bleached hair).

Washes out with shampoo.
