Precious Gem™ Powders

Precious Gem™ Powders are silky smooth, highly pigmented powders that can be used as a beautiful and decorative accent to any makeup design. They will work dry, with your fingertip right out of the shaker or they can be painted by combining the loose powder with **Barrier Spray™** to make a liquid.

- Using a small separate container, spray or pour some **Barrier Spray™** into the bowl and sprinkle the colour powder into the liquid until you achieve the desired coverage.
- Apply with a brush.
- Removes with soap and water.
- This mixture of **Precious Gem™ Powder** and **Barrier Spray™** will appear more intense than the powder alone AND lasts much longer on the skin.
