OPERATIONS UPDATE

Target Energy Limited ("Target") (ASX CODE: TEX) is pleased to provide the following operations update. All reported depths are below the Rotary Table (RT) on the rig floor.

RIVIANA FOODS #1 (TECHE PROSPECT)

Report Date:	9:00 pm 06/02/08 (Western Aust Daylight Time) / 6:00 am 06/02/08 (USA Central Standard Time)
Current Depth:	3,266.6 metres RT
Progress:	Plug back well to 3,266.6m RT. Commence sidetrack operations.
Hydrocarbon Indications	Hydrocarbon shows will only be reported after wireline logs have been run and evaluated at the Total Depth of the well. The well will drill to the programmed Total Depth of 3,810 metres (12,500 feet).
Primary and Secondary Targets	Drilling at the Teche prospect will target up to 22.4 Bcfe of potential recoverable gas and condensate in Oligocene age "Bol mex 2" sands. Additional potential is recognised in a number of other sands which will also be tested in an optimal position.
Comment	As previously advised, it is planned to drill a sidetrack from the existing borehole. We will drill approx 30m past the depth where we originally lost circulation, set a liner and then drill ahead.

Target Energy will earn a 10% Working Interest in the well (subject to completion of earning phase).

While operations are underway, the company will issue routine releases every Thursday or at any such time that material matters require an earlier release.

ENDS
